Summary

Experienced application developer with 7+ years in Java development and also brief stints in front end development. Worked almost entirely in Agile methodology in projects incorporating DevOps practices. Have recently commenced work on movement of the application workload to the cloud. Primary business domain that I have worked in is banking and financial services

Experience

Java Application Developer with DevOps (Bengaluru/Amsterdam)

Tata Consultancy Services

Apr 2018 - Present (4 years +)

Development in Spring MVC with an Angular JS based UI

Migrated the application to Spring boot with the plan to incorporate it into a dockerized environment

Currently working on the application platform migration to Azure

Have worked in a T-shaped environment that includes testing and operational responsibilities along with the primary task of development

The project mainly entails calculation and processing of provisions for various clients of the bank

Worked on-site from Netherlands for 2+ years

Java Application Developer (Bergen/Kochi)

Tata Consultancy Services

Apr 2017 - Mar 2018 (1 year)

Maintenance of multiple applications that were programmed mainly in Spring

The applications catered multiple areas of the bank including funds management, savings and risk calculators and e-invoicing

Worked on-site from Norway

Java Application Developer (Bengaluru/Oslo)

Tata Consultancy Services

Feb 2015 - Mar 2017 (2 years 2 months)

Worked on application development with Spring and Hibernate with RESTful web services

Also developed front-end screens in Apache Wicket

The work mainly catered towards payment solutions
